PROFESSIONAL SUMMARY

I am a 5th semester student at State Polytechnic of Malang, majoring in Information Technology with a study program in Applied Bachelor D-IV of Information Systems Business. I have experience leading the Information Technology Department's orientation program as the Head Coordinator of New Student Group Mentors for 3 study programs and I was a Semifinalist in the 18th KATULISTIWA National Business Plan Competition. From semester 1 to 5, I have studied and understood relevant courses such as Business Intelligence, Data Warehouse, Information Systems Analysis and Design, and Information System Audit. I am looking for a Business Analyst internship at PT Industri Kereta Api (Persero) to apply my analytical skills and support data driven decision making.

ORGANIZATIONAL AND PROJECT EXPERIENCE

Organizing Committee of External Department | Information Technology Student Association, State Polytechnic of Malang — *2025 – 2026 | Malang, East Java*

- Managed communication with external parties and coordinated with 5 different departments within the organization to execute department level events.
- Executed organizational programs by creating detailed event timelines ensuring all activities ran according to schedule.

Head Coordinator of New Student Group Mentors | Information Technology Department, State Polytechnic of Malang — *2025 | Malang, East Java*

- Led a team of mentors across 3 different study programs managing task delegation and daily coordination.
- Controlled the orientation program schedule for all new students ensuring 100 percent of the planned activities were executed on time.

Evento Event Management Web App| Project Based Learning — *2026 – present | Malang, East Java*

- Developed a web platform focused on manual payment verification for event transactions.
- Built the backend logic using Laravel to manage payment status tracking and implemented a secure file upload system for participants to submit their payment proofs.
- **Tech Stack:** React (Frontend), Laravel (Backend), MySQL
- **GitHub:** https://github.com/PraNAtaP/evento-webapp

ReWorth Waste Bank System | Project Based Learning — *2026 | Malang, East Java*

- Developed an integrated waste management system consisting of a main website, a mobile app, and a specific platform for waste sellers.
- Designed the relational database structure and built the backend logic using PHP to manage user transaction data.
- **Tech Stack:** Dart (Flutter for Mobile), PHP (Web), MySQL
- **GitHub:** https://github.com/jsofiah/ReWorth

Data Technology Laboratory Information System | Project Based Learning *2025 | Malang, East Java*

- Built a web-based system to manage laboratory data at the Data Technology Laboratory, State Polytechnic of Malang, including member details, facilities, publications, and gallery.
- Developed the backend using PHP Native and optimized the MySQL database with Stored Procedures and Views for efficient data retrieval.
- **Tech Stack:** PHP Native, MySQL
- **GitHub:** https://github.com/pembunuhGila/PBL

Vice Commander | Student Command Force, State Islamic Senior High School 1 Kediri City *2021 – 2024 | Kediri, East Java*
